MATERIALS NEEDED: Computers, laptops, mobile phones or tablet computers

ATTACHED DOCUMENTS: None

SUGGESTED LEVEL: Easily adaptable to every level.

PROCEDURE

Kahoot! is an online tool that allows you to create and display quizzes, surveys or discussion on a screen for a whole class. Create a free account here <https://getkahoot.com> and start by trying some public quizzes. Then try to create your own quizzes.

- 1.- Teacher projects a Kahoot! Quiz, survey or discussion on a screen.
- 2.- Students join it at <https://kahoot.it> by writing there the pin code displayed on the screen.
- 3.- Teacher launch it when every student has joined the session and is ready for having fun and learn!
- 4.- Students answer the questions by clicking on the coloured buttons on their screens. They get points for being right and fast. The top five rank is displayed between each question.
- 5.- In the end, teacher can download the results on excel format. There you can see all the students results, their mistakes, the time it takes to answer every question. A lot of useful information for evaluating the students can be extracted from it.
