BILINGUAL LEARNING

**ZARAGOZA**  
**THURSDAY**  
**12<sup>TH</sup> MAY 2016**

Dear teacher,

We are delighted to invite you to our ByME day! Our bilingual specialists will provide insight on new and innovative techniques to use within the CLIL classroom. These inspirational workshops introduce creative ideas and projects which will help optimize your classroom and motivate your learners.

It simply wouldn't be the same without you.

We look forward to seeing you there!

Best wishes,

**The ByME Team**

**JOSEPH PARKIN** is a creative English teacher who specialises in communicative teaching methods. Joseph worked for several years as a Primary school teacher in a Bilingual school in Madrid. He now works for Edelvives as pedagogical advisor for young learners. Joseph is a firm advocate of the use of Synthetic Phonics and he regularly implements its elements in the training courses he designs. Participation and good vibrations are the hallmarks of his dynamic training sessions in which he seeks to bring out the inner-child in all of us. Joseph is also a singer and a founder of a linguistic services company based in Madrid.

**MONTSE WATKIN** has 25 years of English teaching experience in a wide range of international contexts, teaching English to children, materials writing, and providing professional development to teachers. She has worked for the British Council both in Spain (as part of the Bilingual Education Project) and abroad, and in international schools. She is one of the authors of the ByME Primary Science books for Primary 1 and 2.

day!

## PROGRAMME

**17.30-18.00 h REGISTRATION**

**18.00-19.00 h FUN, CHEAP AND RECYCLED SCIENCE**

**Joseph Parkin**

An important part of educating future generations is teaching them to look after our planet. If our class activities are respectful to the environment, it will be more likely that our students will be too! This workshop presents a selection of tips and ideas for your science classes using recycled, second-hand or organic materials. Projects, experiments, displays... There's no need for expensive materials and the kids will love them!

**19.00-20.00 h THE POWER OF PLAY IN SCIENCE**

**Montse Watkin**

Play and playfulness not only engages pupils but can be the missing link to raising levels of motivation and involvement. In this session we will use material from the ByME Primary course books and a range of active and creative strategies, to see how the power of play helps pupils explore and interact better with their learning and so achieve a better understanding of both language and content.

**20.00-20.15 h ByME CLIL NEWS**

**20.15 h COME JOIN US FOR A COCKTAIL!**

*day!*
