

Bilingual Education Programme (MEFP-British Council)

‘Selecting and adapting input for bilingual classes’

Philippa Davies Date 10.03.22 17:00 – 18:00 CET

Join **Philippa Davies** for this webinar for teachers of 'non-linguistic' subjects in English in bilingual contexts. **The webinar is aimed at subject teachers who are newer to bilingual subject teaching** but it may be of interest to more experienced colleagues for a chance to consider **task difficulty** through the lens of Cummins' framework and also to **English teachers who support colleagues** with the demands of subject teaching and collaborate in cross-curricular projects.

Philippa will look at **how to select and adapt input for bilingual classes** through lots of practical examples and a simple framework that can be applied to any subject. You'll come away from this webinar with **strategies for selecting texts** and ideas for how to make texts **more comprehensible** for learners of every subject.

***Philippa Davies** is an experienced teacher of Secondary at the British Council. She also works as a teacher trainer for the University of Barcelona and Universitat Pompeu Fabra on the Master for Secondary Teaching. Her courses develop an understanding of ELT methodology in Secondary, with a special focus on TBL and CLIL. She has also collaborated with the regional government in Catalunya to give teacher training courses on TBL and critical thinking for in-service teachers.*
